PRODUCT DESCRIPTION

The Casa Bianca collection brings understated elegance to any interior. Crafted from European White Oak and finished with a matte UV urethane layer containing aluminum oxide, these engineered hardwood floors offer natural beauty with lasting protection. Choose from two distinct profiles: Crema, a classic natural tone with a wire-brushed texture for added character, or Duna, a smooth, refined surface that highlights the wood's natural grain. Casa Bianca creates a clean, continuous look ideal for modern homes, renovations, and design-driven commercial spaces.
