# Boost Mineral

Boost Mineral by Atlas Concorde is inspired by the fine-grained sedimentary stone of the Ardennes. Its subtly textured, colour-body porcelain surface comes in five greys, White, Pearl, Grey, Smoke and Tarmac, in sizes from 12"x24" up to 48"x110" slabs, plus 2 cm outdoor pavers, so the same stone look can run from living spaces out to terraces and pools.
